

# **Exam Questions ITIL-4-Foundation**

ITIL 4 Foundation

### **NEW QUESTION 1**

- (Exam Topic 4)

Which of the four dimensions' focuses on roles responsibilities and systems of authority?

- A. Organizations and people
- B. Information and technology
- C. Partners and suppliers
- D. Value streams and processes

Answer: A

### **Explanation:**

Organizations and people is one of the four dimensions of service management that influence the effectiveness and efficiency of service delivery1. This dimension focuses on the roles, responsibilities, and systems of authority that are needed to deliver and support services2. This dimension also covers the culture, skills, competencies, and collaboration of the people involved in service management3. #### **NEW QUESTION 3**

- (Exam Topic 4)

What is MOST LIKELY to be handled as a service request?

- A. An emergency change to apply a security patch
- B. The implementation of a workaround
- C. Providing a virtual server for a development team
- D. Managing an interruption to a service

Answer: C

## **Explanation:**

A service request is a formal request from a user for something to be provided. Service requests are typically less complex and are either approved or denied based on the budget, need, or urgency.

An emergency change to apply a security patch (A) is not a service request because it is an urgent change that needs to be made to address a security vulnerability. The implementation of a workaround (B) is not a service request because it is a temporary solution to a problem. Managing an interruption to a service (D) is not a service request because it is an incident that needs to be resolved.

Providing a virtual server for a development team (C) is a service request because it is a request for a new service that can be fulfilled by the IT department.

# **NEW QUESTION 4**

- (Exam Topic 4)

Which practice ensures that a variety of access channels are available for users to report issues?

- A. Service desk
- B. Service level management
- C. Incident management
- D. Change enablement

Answer: A

## **Explanation:**

Service desks provide a variety of channels for access including:

- Phone calls, which can include specialized technology, such as interactive voice response (IVR), conference calls, voice recognition, and others.
- Service portals and mobile applications, supported by service and request catalogues, and knowledge bases.
- Chat, through live chat and chatbots.
- Email for logging and updating, and for follow-up surveys and confirmations.
- Walk-in service desk (which are becoming more prevalent in some sectors, such as higher education, where there are high peaks of activity that demand physical presence).,
- > Text and social media messaging, which are useful for notifications in case of major incidents and for contacting specific stakeholder groups, but can also be used to allow users to request support.
- Public and corporate social media and discussion forums for contacting the service provider and for peer-to-peer support. https://www.bmc.com/blogs/itil-service-desk/

#### **NEW QUESTION 5**

- (Exam Topic 3)

- D. To track and manage improvement ideas from identification to final action, organizations use a database or structured document called a continual improvement register (CIR).

Answer: B

# **NEW QUESTION 22**

- (Exam Topic 2)

Which does the ITIL service value system discourage?

- A. Coordinated authorities and responsibilities
- B. Organizational silos
- C. Interfaces among practices
- D. Organizational agility

Answer: B

### **Explanation:**

Architecture of the ITIL SVS specifically enables flexibility and discourages siloed working. This is because the service value chain and practices do not form a fixed, rigid structure, but rather they can be combined in multiple value streams to address the needs of the organization in a variety of scenarios, with open flow of communication across the many interfaces.
